Rick,

I just wanted to send you a quick email stating how much I enjoy your classes. When I enrolled in the medic program I dreaded the day that we would be learning rhythms and just assumed it would be extremely hard. But the way you helped us break it down made it a hundred times better. The amount of time we put into going over them really helped.

Another part of class that blew my mind and made me realize just how good of an instructor/professor you are was the CPR class. I have taken CPR about a dozen times over the years and your class was by far the best one yet. It wasn't just watch a video and practice the skills. It was way more in-depth and had real life applications mixed in. The class was more informative and held my attention much better than just watching a simple video.

Thank you for all you do and the dedication you have for this program. I hope you have years of teaching this program to future paramedics because they need more instructors/professors like yourself!!!

James McCall
